

How to Care For Your Boat Cover

AQUALON FABRIC

Care and Cleaning Instructions

1. Keep dirt, leaves and other debris from accumulating on the fabric surface. Washing down with a garden hose on a bright sunny day is recommended about once a month.
2. To remove dirt from either side of the material, use a soft brush and mild soap solution (such as Ivory). **Do not use bleach!** Rinse thoroughly with clear water and let dry completely before storing or rolling. If accidental tears occur, repair them as soon as possible.
3. **Do not store or roll up while wet.** Be sure to clean and dry before storage. Mildew can grow during storage if moisture is present.
4. Avoid cleaning in commercial car wash or washing machine. **Do not steam or pressure wash.** Keep cover secure over boat while trailoring.
